process. The Client is not bound to accept any proposal, and reserves the right to annul the selection process at any time prior to Contract award, without thereby incurring any liability to the Consultant.

9. **Language**

9.1 The Proposal, as well as all correspondence and documents relating to the Proposal exchanged between the Consultant and the Client, shall be written in the English language.

10. **Documents Comprising the Proposal**

10.1 The Proposal shall comprise the documents and forms listed in the Data Sheet.

10.2 The Consultant shall furnish information on commissions, gratuities and fees, if any, paid or to be paid to agents or any other party relating to this Proposal and, if awarded, Contract execution, as requested in the Financial Proposal submission form (Section 4).

11. **Only One Proposal**

11.1 The Consultant (including the individual members of any Joint Venture) shall submit only one Proposal, either in its own name or as part of a Joint Venture in another Proposal. If a Consultant, including any Joint Venture member, submits or participates in more than one proposal, all such proposals shall be disqualified and rejected. This does not, however, preclude a Sub-consultant, or the Consultant’s staff from participating as Key Experts and Non-Key Experts in more than one Proposal when circumstances justify and if stated in the Data Sheet.

12. **Proposal Validity**

12.1 The Data Sheet indicates the period during which the Consultant’s Proposal must remain valid after the Proposal submission deadline.

12.2 During this period, the Consultant shall maintain its original Proposal without any change, including the availability of the Key Experts, the proposed rates and the total price.

12.3 If it is established that any Key Expert nominated in the Consultant’s Proposal was not available at the time of Proposal submission or was included in the Proposal without his/her confirmation, such Proposal shall be disqualified and rejected for further evaluation, and may be subject to blacklisting in accordance with Clause 5 of this ITC.

**a. Extension of Validity Period**

12.4 The Client will make its best effort to complete the negotiations within the proposal’s validity period. However, should the need arise, the Client may request, in writing, all Consultants who submitted Proposals prior to the submission deadline to extend the Proposals’ validity.

12.5 If the Consultant agrees to extend the validity of its Proposal, it shall be done without any change in the original Proposal and with the confirmation of the availability of the Key Experts.

12.6 The Consultant has the right to refuse to extend the validity of its Proposal in which case such Proposal will not be further evaluated.

**b. Substitution of Key Experts at Validity Extension**

12.7 If any of the Key Experts become unavailable for the extended validity period, the Consultant shall provide a written adequate justification and evidence satisfactory to the Client together with the substitution request. In such case, a replacement Key Expert shall have equal or better qualifications and experience than those of the originally proposed Key Expert. The
technical evaluation score, however, will remain to be based on the evaluation of the CV of the original Key Expert.

12.8 If the Consultant fails to provide a replacement Key Expert with equal or better qualifications, or if the provided reasons for the replacement or justification are unacceptable to the Client, such Proposal will be rejected.

c. Sub-Contracting

12.9 The Consultant shall not subcontract the whole of the Services unless otherwise indicated in the **Data Sheet**.

### 13. Clarification and Amendment of RFP

13.1 The Consultant may request a clarification of any part of the RFP during the period indicated in the **Data Sheet** before the Proposals’ submission deadline. Any request for clarification must be sent in writing, or by standard electronic means, to the Client’s address indicated in the **Data Sheet**. The Client will respond in writing, or by standard electronic means, and will send written copies of the response (including an explanation of the query but without identifying its source) to all shortlisted Consultants. Should the Client deem it necessary to amend the RFP as a result of a clarification, it shall do so following the procedure described below:

13.1.1 At any time before the proposal submission deadline, the Client may amend the RFP by issuing an amendment in writing or by standard electronic means. The amendment shall be sent to all shortlisted Consultants and will be binding on them. The shortlisted Consultants shall acknowledge receipt of all amendments in writing.

13.1.2 If the amendment is substantial, the Client may extend the proposal submission deadline to give the shortlisted Consultants reasonable time to take an amendment into account in their Proposals.

13.1.3 The Consultant may submit a modified Proposal or a modification to any part of it at any time prior to the proposal submission deadline. No modifications to the Technical or Financial Proposal shall be accepted after the deadline.

### 14. Preparation of Proposals – Specific Considerations

14.1 While preparing the Proposal, the Consultant must give particular attention to the following:

14.1.1 If a shortlisted Consultant considers that it may enhance its expertise for the assignment by associating with other consultants in the form of a Joint Venture or as Sub-consultants, it may do so with either (a) non-shortlisted Consultant(s), or (b) shortlisted Consultants if permitted in the **Data Sheet**. In all such cases a shortlisted Consultant must obtain the written approval of the Client prior to the submission of the Proposal. When associating with non-shortlisted firms in the form of a joint venture or a sub-consultancy, the shortlisted Consultant shall be a lead member.

14.1.2 The Client may indicate in the **Data Sheet** the estimated Key
Experts’ time input (expressed in person-month) or the Client’s estimated total cost of the assignment. This estimate is indicative and the Proposal shall be based on the Consultant’s own estimates for the same.

14.1.3 If stated in the Data Sheet, the Consultant shall include in its Proposal at least the same time input (in the same unit as indicated in the Data Sheet) of Key Experts, failing which the Financial Proposal will be adjusted for the purpose of comparison of proposals and decision for award in accordance with the procedure in the Data Sheet.

14.1.4 For assignments under the Fixed-Budget selection method, the estimated Key Experts’ time input is not disclosed. Total available budget, with an indication whether it is inclusive or exclusive of taxes, is given in the Data Sheet, and the Financial Proposal shall not exceed this budget.

### 21. Evaluation of Technical Proposals

21.1 The Client’s evaluation committee shall evaluate the Technical Proposals on the basis of their responsiveness to the Terms of Reference and the RFP, applying the evaluation criteria, sub-criteria, and point system specified in the Data Sheet. Each responsive Proposal will be given a technical score. The evaluation committee shall compute the score obtained by each proposal by taking the average of the scores given by each member of the evaluation committee to the proposal. A Proposal shall be rejected at this stage if it does not respond to important aspects of the RFP or if it fails to achieve the minimum technical score indicated in the Data Sheet.

21.2 Proposed experts, involved in the firms’ work in hand will not be considered for evaluation to the extent of this involvement in the ongoing assignment.

### 22. Financial Proposals for QBS

22.1 Following the ranking of the Technical Proposals, when the selection is based on quality only (QBS), the top-ranked Consultant is invited to negotiate the Contract.

22.2 If Financial Proposals were invited together with the Technical Proposals, only the Financial Proposal of the technically top-ranked Consultant is opened by the Client’s evaluation committee. All other Financial Proposals are returned unopened after the Contract negotiations are successfully concluded and the Contract is signed.

### 23. Public Opening of Financial Proposals (for QCBS, FBS, and LCS methods)

23.1 After the technical evaluation is completed and the DP has issued its no objection (if applicable), the Client shall notify those Consultants whose Proposals were considered non-responsive to the RFP and TOR or did not meet the minimum qualifying technical score (and shall provide information relating to the Consultant’s overall technical score) that their Financial Proposals will be returned unopened after completing the selection process and Contract signing. The Client shall simultaneously notify in writing those Consultants that have achieved the minimum overall technical score and inform them of the date, time and location for the opening of the Financial Proposals. The opening date should be at least 7 days for national shortlisting and 15 days for international shortlisting for attending the opening. The Consultant’s attendance at the opening of the Financial Proposals is optional and is at the Consultant’s choice.

23.2 The Financial Proposals shall be opened by the Client’s evaluation committee in the presence of the representatives of those Consultants whose proposals have passed the minimum technical score. At the opening, the names of the Consultants, and the overall technical scores, shall be read aloud. The Financial Proposals will then be inspected to confirm that they have remained sealed and unopened.

These Financial Proposals shall be then opened, and the following information will be recorded:
(a) Name and address,
(b) Proposed service charge,
(c) Discount offered, if any;
(d) Description of the discrepancies, if any, between figure and words,
(e) Whether the financial proposal is signed or not by authorized representative of consultant,
(f) If any matter or content of the financial proposal is effaced whether such efface is signed by the consultant or his/her representative or not and the details of the amount and the content effaced,

Section 7. Terms of Reference

Government of Nepal
Ministry of Land Management, Cooperatives and Poverty Alleviation
Singha Durbar, Kathmandu

Terms of Reference (ToR)
For the Consulting Firms to conduct Feasibility Study for Poverty Alleviation Projects in Province 1 of Nepal (As per Schedule 4 of Constitution of Nepal)

1 Background:
Nepal is one of the least developed countries in the world, where nearly one-quarter of the population still lives below the poverty line. Agriculture, provides a livelihood to about 70 percent of the population whereas it has contributed only 27.6 percent to the GDP in the fiscal year 2017/18. It heavily relies on remittance, which amounts 24.25% of total GDP according to recent study. The major industrial activity in Nepal involves the processing of agricultural products, including pulses, jute, sugarcane, tobacco, and grain. Our economic development has been constrained by the poverty, landlocked geographic location, population growth, underemployment, less developed transportation infrastructure, civil strife and labor unrest, and its susceptibility to natural disaster. In this regard, Government of Nepal (GoN) through its periodic development plans has been striving to alleviate the poverty since the inception of the planning exercise in Nepal. After the acceptance of the federalism with three tiers of structure; federal, provincial and local, GoN has been using the administrative boundaries of 7 provinces which further divides into districts and urban/rural municipalities for locating the poverty and its status as well as implementation of the poverty related programs and projects. According to the National Population Census 2011, the annual growth rate of population is 1.35 percent and the total population of the country in 2011 has reached about 26.5 million with sex ratio of 94.2. The per capita GDP at current prices stands at NRs. 1,03,335 for the year 2017/18 as per the Economic Survey FY 2017/18. The economic growth of the country measured by GDP is 1.66 percent per year. About one fourth of the population (25.16%) lives below poverty lines as per the Nepal Living Standards Survey 2010/11 and the Gini-Coefficient, which indicates inequality in income distribution, is 0.328 as per the data of World Bank, 2010. Further, about 21.6% of the total populations of Nepal are living under national poverty line as per the Nepal Millennium Development Goals, Final Status Report 2000-2015.

According to national population census 2011, 80.70% of households are in rural areas while only 19.30% are in urban areas of Nepal. Ecological distribution of household population in mountain region is 6.7%, in the hill region it is 46.70%, and in the terai region it is 46.60%

In the National level, the poverty rate is declining satisfactorily. However, disparities remain in geographical area, in rural and urban population and in different ethnic groups. Poverty rates in rural areas, where more than 80 percent of the population lives, is higher than those in urban areas. In addition, the rate of poverty incidence for some social
groups, such as Dalits and Janajati, are much higher than the national average. Poverty concentration in the East and Central has declined while it increased in the rest. To achieve the long term goal of making a nation free from the vicious cycle of poverty and developing a competitive and capable society, it is necessary to properly address the following issues.

Agricultural sector is the backbone of our national economy because it contributes more than one-fourth in gross domestic product and two third of population are engaged in this profession. Agriculture dependent economy is suffering from traditional agriculture system, low irrigation facilities, lack of proper rural infrastructure development etc. It is therefore, difficult to achieve poverty alleviation goals without boosting agricultural productivity, by its diversification and commercialization. It is important to extend our reach to the economic activities of the underprivileged groups to make them dependent by changing their social life style and traditional production process. It is also necessary to strengthen the local governments which promote transparency, accountability and social justice in developmental process.

It is equally important to empower women, marginalized agriculture workers, indigenous groups and poorest citizens those lagging behind in human developmental indicators and other economic and social indicators. Even though, poverty and human development indicators have been improving at the national level; widespread disparities with respect to caste, ethnicity, geography and gender still exist. The key reason for existing disparities amid social groups is political deprivation, which arises from a lack of political representation of women and different ethnic and caste groups in mainstream political parties and government institutions. Disparities by caste, ethnicity and gender also exist in representation in state organs, administration, leadership positions of constitutional bodies, bureau of political parties and civil society organizations. Hence, data from different study shows that females, Dalits, Janjatis, Madhesis and Muslims were under represented in almost all organs of state and society. As a result, these groups are lacking in voice and unable to get access to the nation's resource. so, some sort of influence and advocacy is necessary for removing barriers and increasing access to development opportunities that will result in improved livelihood status. Unemployment problem can be tackled by providing skill-based trainings according to national and international market requirements and producing skillful manpower. Social mobilization may be another good strategy to empower backward community and to reduce poverty.

To reduce poverty, we have to achieve full and productive employment and decent work for all, including women and youth. These include continued implementation of targeted income-generating and employment programs along with increasing the participation of target groups in decision making. Reinforcing empowerment programs through skills enhancement and vocational training, training for productive employment, community based entrepreneurship, micro-credit and micro-enterprise development programs, cooperative establishment and promotion.

In this endeavor, government of Nepal established Ministry of Co-operatives and Poverty Alleviation (MoCPA) on 5thJestha 2069 BS which now has been merged as ministry of Land Management, Cooperatives and Poverty Alleviation. It is the dedicated ministry for carrying on the work related to poverty alleviation. **Western Uplands Poverty Alleviation Project (WUPAP)** was a project under the then MoCPA in a joint endeavor between Government of Nepal and International Fund for Agriculture Development
(IFAD) to alleviate widespread poverty in the hills and mountains of mid and Far Western Development Regions. The overall goal of the project was to strengthen the livelihood systems of the target group focusing on poverty alleviation through a right-based approach, by promoting and forming of grassroots level organizations to empower the participants to mobilize their natural, physical, and financial resources to harness external resources and obtain social justice.

From the above scenario, conducting feasibility study, implementation, monitoring and evaluation of project related to poverty alleviation is one of the important tasks of the federal government in order to eliminate the prevailing poverty of the nation and as a dedicated ministry, Ministry of Land Management, Cooperatives and Poverty Alleviation has to carry out this function. However, for this the Ministry does not have sufficient manpower and technical expertise. Therefore, Ministry has planned to hire an eligible consulting firm to conduct the ‘Feasibility Study of Projects and programs for Poverty Alleviation of provinces 1 & 5’ in the fiscal year 2075/76.

2 Objectives of the study: The main objective of this assignment is as follows:

PART II

Section 8. Conditions of Contract and Contract Forms

Foreword

1. Part II includes standard Contract forms for Consulting Services (a Lump-Sum Contract).

2. **Lump-Sum Contract**: This type of contract is used mainly for assignments in which the scope and the duration of the Services and the required output of the Consultant are clearly defined. Payments are linked to outputs (deliverables) such as reports, drawings, bill of quantities, bidding documents, or software programs. Lump-sum contracts are easier to administer because they operate on the principle of a fixed price for a fixed scope, and payments are due on clearly specified outputs and milestones. Nevertheless, quality control of the Consultant’s outputs by the Client is paramount.
